

What is IMS Global ONE ROSTER™

one · ros·ter
/wən 'rəstər/

a technology standard developed by IMS Global Learning Consortium that replaces multiple/proprietary class roster templates with one common web service, agreed to by all members of the industry.

THE STANDARD DEFINES...

- Data fields, tables and data relationships
- REST API's or CSV templates to deliver data
- Secure authentication/security provisions

THE STANDARD IS...

- An open technology standard collaboratively built by industry leaders
- An accepted set of CSV templates and REST APIs
- Freely available for school districts and providers at oneroster.org
- Adopted by many large and small publishers

THE STANDARD IS NOT...

- A “pay for data access” model where publishers pay fees to data holders and then charge school districts to recover those costs
- Proprietary technology that requires license fees
- An actual software application

Why we created

Challenges	Solution
Missing logins and incorrect class rosters are a key reason why online resources fail in the classroom.	With ClassLink OneRoster, schools can eliminate these problems before they happen.
Creating custom roster extracts for each provider falls on an already overburdened district IT staff.	ClassLink OneRoster is an easy, secure and free approach to class roster delivery.
Students and teachers who actively use all their digital learning resources will want single sign-on.	ClassLink OneClick Single Sign-On offers instant access to any learning resource.

ClassLink OneRoster is certified by IMS Global

Digital resources without class rosters
is like teaching to an empty classroom.

**ClassLink is streamlining
the delivery of class rosters.
Get them in. Keep them learning.**

No-cost, secure, and easy delivery of rosters to any publisher, app, or platform.

- ✓ A simple web console to select and deliver class rosters
- ✓ Free for publishers and platform providers
- ✓ Free and open oneroster.org interoperability standard
- ✓ Student data is kept secure on school servers
- ✓ Free for schools

"ClassLink OneRoster has been a calming force at the beginning of the school year rush. We have been able to quickly give our students and teachers access to content and move on to other important parts of the work that has to be done to educate students."

- Maurice Draggan, Director

"ClassLink OneRoster is reducing a huge burden for our team by simplifying the roster process. And, now we have more control, greater security, and better outcomes."

- Matt Frey, Instructional Technology

"We are thrilled with the support that companies like ClassLink have shown us in using open IMS Global Learning standards."

-Rob Abel, CEO
